SPARK AI CORPORATE FORUM
SUMMARY OF MEMBER BENEFITS 2026

THOUGHT LEADERSHIP

Be an active force in partnering with us to help define and shape the future of the SPARK AI Industry Consortium

- Seat on the Executive Committee (EC) and opportunity for an additional member to join the Advisory Board
- Opportunity to host guest lectures and engage in SDSC and campus wide initiatives
- Opportunity to co-host industry events in partnership with other Forum and ARC members
- Forum member recognition and participation in external industry and academic events

RESEARCH AND INNOVATION

Forum membership gives you access to world-class research faculty, government and industry executives, and university-based research center and laboratory partners

- Early exposure to high-potential research directions, before they are published or commercialized
- Cost-Efficient R&D with leverage (multiplied by grants and shared research infrastructure)
- Independent validation and credibility (perceived objectivity and methodological rigor)
- Opportunities to co-author and publish points of view (POV), intelligence briefings (IBs), and working papers

ACCESS TO TALENT

Opportunities to establish a curated talent pipeline and mentorship of interdisciplinary students at all degree levels – Bachelors, Masters, PhD and alumni. We partner with other UCSD and external University student programs for scale

- Opportunities to host or participate in events such as Tech Talks, Company Visits, Talent Days, etc.
- Summer internship opportunities for companies, government agencies, and students
- Opportunities to hold tailored student engagement events

EDUCATION AND WORKFORCE CAPABILITY DEVELOPMENT

Executive Education, Specialized Workshops, Extended Studies

- Targeted programs and workshops in frontier and underserved technical domains, including quantum systems, semantics data engineering, and context-aware storage systems, aligned to industry needs
- Structured exposure to AI governance, regulation, and emerging legislation, reducing compliance risk and improving understanding and readiness for policy change
- Customizable curriculum development with industry input, ensuring relevance as technologies and regulatory environments evolve

Annual Membership based on sliding scale of company revenue (ARR):

Startup	Pre-revenue to $10M ARR	$5K
Mid-Market	$10M to $200M ARR	$10K
Enterprise	>$200M ARR	$15K
